Summary

Aspiring Data Science & AI Developer with a strong foundation in Python, machine learning, and data analytics. Proficient in data preprocessing, exploratory data analysis (EDA), and statistical techniques to extract meaningful insights. Experienced in building interactive dashboards using Power BI and Tableau, and working with SQL for data querying and analysis. Passionate about developing scalable, data-driven solutions to solve real-world problems.

Skills

Programming: Python, Java (Basic), C (Basic)

Data Science & Analytics: NumPy, Pandas, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Modeling, KPI Tracking

Machine Learning & AI: Machine Learning, Neural Networks

Data Visualization: Matplotlib, Seaborn, Power BI, Tableau, Excel (Pivot Tables, Charts, Dashboards)

Databases & Querying: SQL, MySQL, MongoDB

Tools & Technologies: Git, GitHub, Docker

Core Concepts: Object-Oriented Programming (OOPs), Data Structures & Algorithms

Experience

Elevate Labs | (Remote)

Data Analyst Intern

(Duration: April 2026 – May 2026)

- Performed data cleaning and preprocessing using **Python (Pandas, NumPy)**
- Conducted **Exploratory Data Analysis (EDA)** to identify patterns and trends
- Built dashboards and reports using **Power BI / Tableau / Excel**
- Worked with **SQL** to extract and analyze structured data
- Generated insights to support data-driven decision-making

InternCourse | (Remote)

Data Science Intern

(Duration: Aug 2025 – Nov 2025)

- Completed a 3-month internship in Data Science, working with real-world datasets
- Performed data cleaning and preprocessing using Python (Pandas, NumPy)
- Conducted Exploratory Data Analysis (EDA) to identify trends and patterns
- Built data visualizations and dashboards using Excel / Power BI / Tableau
- Applied analytical techniques to generate insights for decision-making

Projects

Med-Guard AI – Fake Medicine Detection & Patient Safety System | Python, Pandas, NumPy, Power BI, MongoDB

- Collaborated in a team to develop a system for detecting counterfeit medicines and ensuring patient safety
- Performed data cleaning and exploratory data analysis (EDA) on medicine scan data using Python
- Built interactive dashboards in Power BI to visualize fake medicine trends and risk patterns
- Designed KPIs to track counterfeit detection rates and batch-level risk analysis
- Improved counterfeit detection insights by ~30% through effective data visualization and KPI tracking

- Reduced manual analysis time by ~25% by automating data processing workflows

NeuroOps Smart System – AI-Based Cloud Failure Detection & Auto-Recovery | Python, AWS, Machine Learning, REST APIs

- Built an intelligent system to monitor and detect cloud application failures using AI models
- Implemented auto-recovery mechanisms, reducing downtime and improving availability
- Designed a scalable architecture for real-time monitoring and alert generation
- Simulated failure scenarios and optimized system response time
- Reduced system downtime by ~35% through automated recovery mechanisms
- Improved failure detection speed by ~40% using AI-based monitoring models
- Enhanced system reliability and response efficiency in simulated environments

Awards & Certifications

- Participated in **6 National-Level Hackathons**, gaining hands-on experience in real-world problem solving and team collaboration .
- Programming in Python – NPTEL
- Agile Software Development & DevOps - IBM
- Cloud Computing Certification - Infosys Springboard
- Data Analyst Internship - Elevate Labs.
- Data Science Internship - InternCourse
- Advanced Python Certification - Infotech Solutions
- Power BI Workshop - Office Master.

Education

B.Tech in Computer Science Engineering

Reva University, Bengaluru

Graduation: 2027

CGPA: 8.2 / 10
